

## Jennifer S. Nyland

Jennifer advises public utilities as well as resource companies and other private sector clients on regulatory and environmental matters. Jennifer's environmental experience includes advising clients on requirements for environmental assessments, contaminated sites due diligence and remediation, and various types of project permitting. Jennifer has also assisted in regulatory matters such as public utility rate-setting, tariffs, and access to transmission and storage.

Prior to enrolling in law school, Jennifer worked as an electrical engineering consultant before co-founding a software company. She ran the engineering department there for eight years, and successfully managed the group through two acquisitions.
